Abstract for IAS Focused Program on Reticular Quantum Matter (Nov 30 - Dec 4, 2026)

Advances in the Design of 2D Networks at Surfaces

David Écija

Quantum Materials Group, IMDEA Nanociencia, Spain

Email: david.ecija@imdea.org

Reticular materials have captivated materials science. In this talk I will revise our discoveries over the last decade comprising the design and characterization at the atomic scale in ultra-high vacuum conditions of 2D networks, including metal-directed, organometallic and covalent nanoarchitectures.
